Student: 09 CHEUNG Ethan Tung Hei

Objective/Background/Motivation

- *Inspired by TensorFlow's "Helping doctors detect respiratory diseases using machine learning"*

- *Want to solve problems of malnutrition*
- *Malnutrition leads to health problems*

Existing Solution

- **No solutions with technology**

- **Traditional solution would be to visit a doctor**

- **It is expensive to visit a doctor**
- **Doctor may diagnose wrongly**

Your Solution

- **Use AI to predict malnutrition by looking at your nails**

- **Having a deficiency of a certain nutrient will cause your nails to have a certain pattern**

- **Give dietary advice based on the user's deficiencies**

Resources Needed

- **Training set**

- **Camera**

- **Knowledge from skin doctor.**
